

Cafe Femenino Foundation 2011 Grant Request

HEALTHY KITCHENS \$2,500

Colombia

This project is found to be necessary in order to improve the health of the women, girls and small children of the coffee farmers. Lung disease is very prevalent in the areas where we work due to the fact that typically, all the cooking is done over a wood-burning stove that ventilates into the room. This project aims to reconstruct several kitchens with the ventilation necessary to improve the health conditions.
